● Software Development Manager

ENTRATA — Jan 2016 - July 2019

Writing efficient user stories, user acceptance criteria, and carrying out sprint-planning meetings, and daily scrums. Work closely with internal managers, user experience designers, architects, and other Software Development Managers, in addition to managing multiple offshore development teams.

- Grew the companies migration capacity by 5x through automation and UI enhancements.
- Created multiple vertices in the companies migration product including commercial, military, and Affordable.
- Enabled all migration teams to move from a 20% delivery rate to over 75% every sprint.

PROJECTS

● SubLasa Website

WWW.SUBLASA.COM React | JavaScript | Postgres | Yarn | Bulma | Google API

Website that allows a user to subscribe and read their favorite newsletter without having to share their email or personal information with dozens of companies.

- Used google apis to manage newsletter subscriptions by moving over their content in html format to display on the site.
- Used local autorization to create and manage user profiles, allowing them to subscirbe to indvidual newsletters.
- Used postgres and JavaScript to determin newsletters that have been read allowing the site to surface most popular newsletters.
